Part 1: Data

Description of each relation in the schema:

Relation	Attributes	Description
Movie	Id	Primary key(s): Id
	Budget	
	Homepage	Foreign key(s): None
	Original language	
	Title	This relation contains all movies attribute that is single value. <u>Note:</u> All single value attributes are listed to the left side.
	Tagline	
	Vote average	
	Vote count	
	Status	
	Release date	
	Run time	
	Revenue	
	Popularity	
	Overview	
	Original title	

(Table 1: Movie relation)

Relation	Attributes	Description
Genre	Id	Primary key(s): Id
		Foreign key(s): None
	name	This relation contains all unique genres id and their names.

(Table 2: Genre relation)

Relation	Attributes	Description
SpokenLanguage	iso_639_1	Primary key(s): iso_639_1
		Foreign key(s): None
	name	This relation contains all unique spoken languages id and their names.

(Table 3: SpokenLanguage relation)

Relation	Attributes	Description
ProductionCountries	iso_3166_1	Primary key(s): iso_3166_1
		Foreign key(s): None
	name	This relation contains all unique country id and their names.

(Table 4: ProductionCountries relation)

Relation	Attributes	Description
ProductionCompanies	id	Primary key(s): id
		Foreign key(s): None
	name	This relation contains all unique company id and their names.

(Table 5: ProductionCompanies relation)

Relation	Attributes	Description
Keywords	id	Primary key(s): id
		Foreign key(s): None
	name	This relation contains all unique keywords id and their names.

(Table 6: Keywords relation)

Relation	Attributes	Description
FromCountry	mld	Primary key(s): None
		Foreign key(s): mld, cld
	cld	This is a join table contains foreign keys: <ul style="list-style-type: none"> • mld reference to Movie.id • cld reference to ProductionCountries.id

(Table 7: FromCountry relation)

Relation	Attributes	Description
FromCompany	mld	Primary key(s): None
		Foreign key(s): mld, cld
	cld	This is a join table contains foreign keys: <ul style="list-style-type: none"> • mld reference to Movie.id • cld reference to ProductionCompanies.id

(Table 8: FromCompany relation)

Relation	Attributes	Description
HasKeyword	mld	Primary key(s): None
		Foreign key(s): mld, kld
	kld	This is a join table contains foreign keys: <ul style="list-style-type: none"> • mld reference to Movie.id • kld reference to Keywords.id

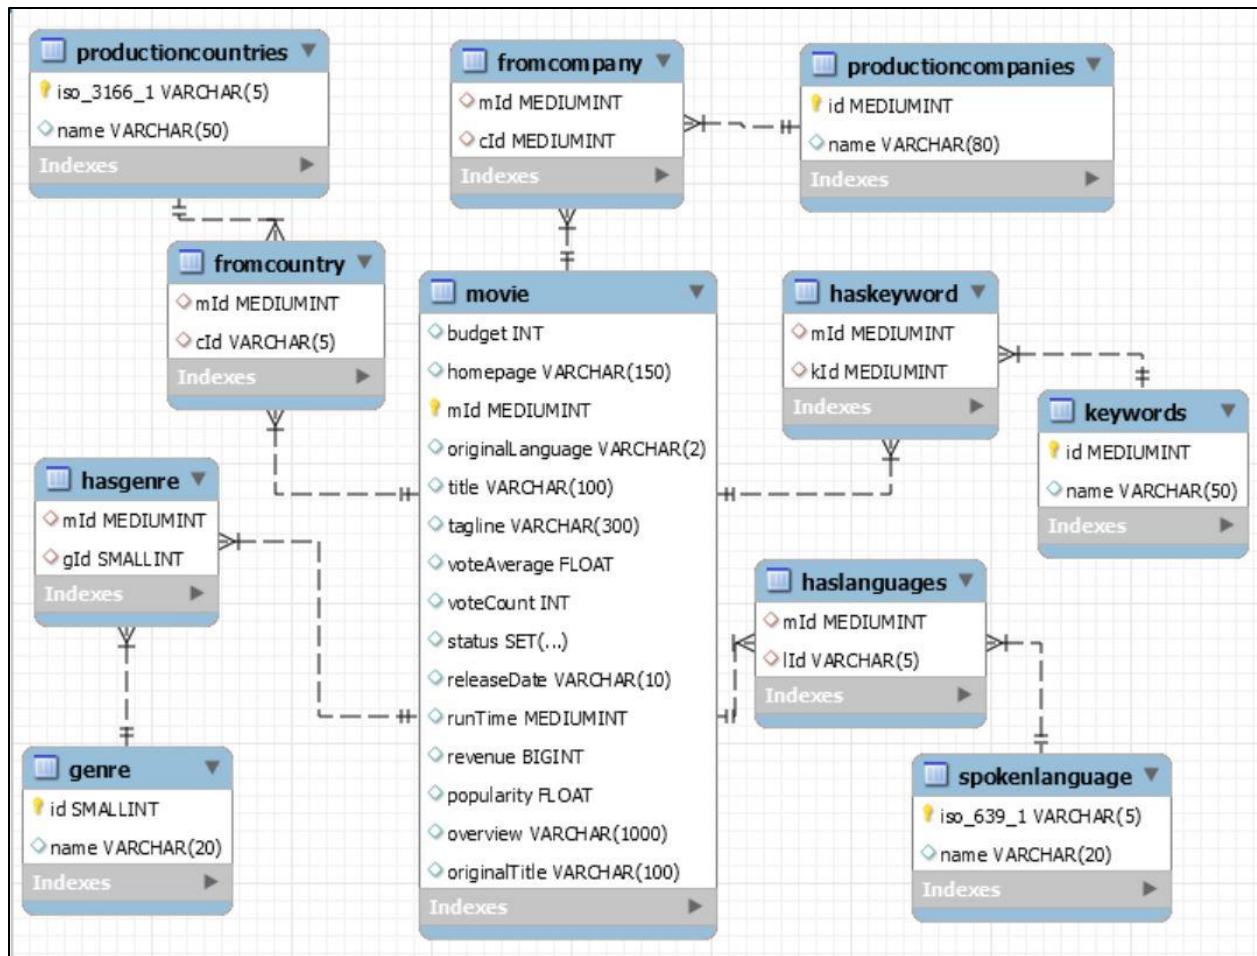

(Table 9: HasKeyword relation)

Relation	Attributes	Description
HasGenre	mld	Primary key(s): None
		Foreign key(s): mld, gld
	gld	This is a join table contains foreign keys: <ul style="list-style-type: none"> • mld reference to Movie.id • gld reference to Genre.id

(Table 10: HasGenre relation)

Relation	Attributes	Description
HasLanguages	mld	Primary key(s): None
		Foreign key(s): mld, lld
	lld	This is a join table contains foreign keys: <ul style="list-style-type: none"> • mld reference to Movie.id • lld reference to SpokenLanguage.id

(Table 11: HasLanguages relation)

(Figure 1: Database schema)

Analysis of the schema:

To recap:

- 1NF: each attribute of a table must have single value
- 2NF: Non non-prime attribute is dependent on the proper subset of any candidate key of the table
- 3NF: each functional dependency $X \rightarrow Y$, X is a super key of the table, Y is a prime attribute of the table

As shown in table (1-11) and figure 1, all relations are in 1NF, 2NF and 3NF since each relations has a primary key that is also a super key of the table.

PART 2: Queries

1. 10% What is the average budget of all movies? Your output should include just the average budget value.

```
SELECT voteAverage AS 'vote average'
FROM Movie
LIMIT 5;
```

vote average
6.5
8.1
7.6
8.2
7.9

2. 10% Show the movies that were produced in the United States. Your output must include the movie title and the production company name.

```
SELECT Movie.title AS 'movie title' , ProductionCompanies.name AS 'production company name'
FROM Movie
INNER JOIN FromCompany
ON Movie.mId = FromCompany.mId
INNER JOIN ProductionCompanies
ON FromCompany.cId = ProductionCompanies.id
INNER JOIN FromCountry
ON Movie.mId = FromCountry.mId
INNER JOIN ProductionCountries
ON FromCountry.cId = ProductionCountries.iso_3166_1
WHERE iso_3166_1 = "US"
LIMIT 5;
```

movie title	production company name
Four Rooms	Miramax Films
Four Rooms	A Band Apart
Star Wars	Lucasfilm
Star Wars	Twentieth Century Fox Film Corporation
Finding Nemo	Pixar Animation Studios

3. 10% Show the top 5 movies that made the most revenue. Your output must include the movie title and how much revenue it brought in.

```
SELECT title AS 'movie title', revenue
FROM Movie
ORDER BY revenue DESC
LIMIT 5;
```

movie title	revenue
Avatar	2787965087
Titanic	1845034188
The Avengers	1519557910
Jurassic World	1513528810
Furious 7	1506249360

4. 10% What movies have both the genre Science Fiction and Mystery. Your output must include the movie title and all genres associated with that movie.

```
SELECT Movie.title, GROUP_CONCAT(Genre.name)
FROM Movie
INNER JOIN HasGenre
ON Movie.mId = HasGenre.mId
INNER JOIN Genre
```

```

ON HasGenre.gId = Genre.id
WHERE Movie.mId in (
    SELECT Movie.mId
    FROM Movie
    INNER JOIN HasGenre
    ON Movie.mId = HasGenre.mId
    INNER JOIN Genre
    ON HasGenre.gId = Genre.id
    WHERE Genre.name = 'Science Fiction' or Genre.name = 'Mystery'
    GROUP BY Movie.title
    HAVING COUNT(*) = 2)
GROUP BY Movie.title
LIMIT 5;

```

title	GROUP_CONCAT(Genre.name)
2001: A Space Odyssey	Science Fiction,Mystery,Adventure
Atlas Shrugged Part II	Drama,Science Fiction,Mystery
Atlas Shrugged Part III: Who is John Galt?	Drama,Science Fiction,Mystery
Beneath the Planet of the Apes	Adventure,Science Fiction,Mystery
Blindness	Drama,Mystery,Science Fiction,Thriller

5. 10% Find the movies that have a popularity greater than the average popularity. Your output must include the movie title and their popularity.

```

SELECT title, popularity
FROM Movie
WHERE popularity > (SELECT AVG(popularity) FROM Movie)
LIMIT 5;

```

+-----+	
title	popularity
+-----+	
Four Rooms	22.8762
Star Wars	126.394
Finding Nemo	85.6888
Forrest Gump	138.133
American Beauty	80.8786
+-----+
